

Legacy services closure dates reminder

This is a reminder to partners that end of life date (30 December 2016) is now approaching for the following legacy services

- Inmarsat B (Land and Maritime)
- Aero Mini-M
- Government Land GAN and Land Mini-M
- Maritime Mini-M

Partners were reminded not to activate new customers for the above services on 30 September 2014.

What is 'EOL'?

'End of Life - EOL' is the time when the terminals associated with the retired services are deactivated on the network and the services are no longer available to customers.

Why is Inmarsat ending legacy services?

We are ending these services since they have been replaced by newer ones offering higher speeds, cost effective and flexible tariffs, and superior quality, accessed through smaller and lighter terminals.

When will these services 'EOL'?

EOL dates for the retired services are scheduled for:

Service name	Date of EOL
Land and Maritime Inmarsat B	30 December 2016
Government Land GAN	30 December 2016
Government Land Mini-M	30 December 2016
Maritime Mini-M	30 December 2016
Aero Mini-M	30 December 2016

What alternate solutions are available to customers?

Any remaining customers should upgrade to one of the following services:

Service name	Recommended Replacement Service
Land Inmarsat B	GSPS services
Maritime Inmarsat B	FleetBroadband
Government Land GAN	For any recommendation on Government replacement services please contact your Inmarsat account manager
Government Land Mini-M	
Maritime Mini-M	Fleet One
Aero Mini-M	SwiftBroadBand

What happens to the service fees & charges?

Customers should also be aware that normal fees & charges continue to apply while any terminal is active on the network and the respective service is in use.

Who should partners contact for further information?

For further information, or to discuss migration plans to other solutions, please contact your account manager.
