## digiMed Five Plus Telemedicine Kit

The digiMed Five Plus is a telemedicine kit designed to support multiple services. From emergent care requiring real-time communication with medical personnel and immediate diagnosis of an injured patient to home healthcare visits to monitor a patient's progress. The multi-party video calling capability allows for multiple medical specialists in different locations to collaborate simultaneously no matter where they are. All medical device data is streamed live, encrypted to all participants displaying on an easy to read dashboard for immediate diagnosis.

### Features

- All transmissions are encrypted using 256 bit AES
- Multi-party video, voice, text and file transfer
- Secondary private channel video collaboration
- Live medical device data streaming
- Multi-camera selection
- User selected image quality adjustment
  - 320x240, 640x480, 1280x720 (HD)
- User selected bandwidth- 6Kbps to 300Kbps
- Auto medical data export via HL7 format
- On-site care provider identifier info input
- Image snap and auto send
- Screen shot and auto send
- Real-time on-site note taking and live transmission
- Operates on Windows PC, Android and iOS systems

### Physical Specifications

- Weight < 10 lbs.
- Dimensions- 15 1/4"L x 10"H x 9"D

## Components

The Five Plus includes-

- 10" Windows Tablet
- Bluetooth Thermometer
- Bluetooth Pulse Oximeter
- Bluetooth Blood Pressure Monitor
- Bluetooth Blood Glucose Meter
- Bluetooth Single Lead ECG
- Bluetooth Keyboard
- USB Macro Camera
- Hands Free Speakerphone
- USB Ethernet Adapter
