VDR
Voyage Data Recorder

S-VDR
Simplified Voyage Data Recorder

Models:
VR-7000/7000S

VDR REMOTE ALARM PANEL
VR-7017

www.furuno.com

Records all crucial data to help identify the cause of marine accidents, as well as contribute to the prevention of future accidents

A Voyage Data Recorder (VDR) and Simplified Voyage Data Recorder (S-VDR) are similar to the black boxes carried on aircraft. The VDR/SVDR aids investigators in securing evidence by reviewing procedures and instructions in the moments before an accident. The VDR/SVDR collects data from all interfaced sensors on board the vessel, storing it in an external Data Recording Unit (DRU). The system comes with two tamperproof DRU units, one fixed and one float-free. They are designed to withstand the extreme impact, pressure, shock and heat, which may happen during an incident. When the DRU is retrieved, the stored data can be replayed by authorities to investigate the cause of the accident.

VDR
Voyage Data Recorder

S-VDR
Simplified Voyage Data Recorder

▶ **Complies with the IMO performance standards for VDR and S-VDR**
- Data storing for 48 hours both in fixed and float-free recording medium
- Data storing for 30 days/720 hours in SSD in the Data Collecting Unit
- No.1, 2 Radar and main ECDIS display images can be stored
  * Up to 5 display images from FURUNO Radar FAR-3000/FCR-2xx9 series or FURUNO ECDIS FMD-3200/3300 can be stored simultaneously through Ethernet without optional SSD.
  * Radar and ECDIS images can be recorded at 15-second intervals.

▶ **Easy to integrate with IBS Network**
  * Radar and ECDIS that utilizes LAN interface based on IEC 61162-450 can be connected through Ethernet.

▶ **Video LAN converter can convert the Radar signal (DVI or RGB) into Ethernet**
  * Necessary when FURUNO Radar FAR-15x8/FAR- 2xx7, ECDIS FEA-2107/2807 or the products of third-party manufacturers are connected to VR-7000/7000S.

▶ **Optional sensor adapter gathers all the serial/analog/digital sensor data and collectively feeds it to DCU**
  Multiple sensor adapters can be interfaced depending upon the number of sensors to be interfaced.

▶ **"Live Player V5" allows monitoring and playback of collected data on a PC. In adition, remote replay and remote extraction via satellite connection available.**

▶ **Extracted data can be saved onto a USB flash memory**

▶ **Global customer support and services with FURUNO worldwide service network**

▌Simplified Voyage Data Recorder VR-7000S

- Complies with the IMO performance standards for S-VDR, MSC 163(78)
- Applied to S-VDR carriage requirement for existing cargo ships over 3,000GT
- Selectable DRU: fixed DRU or float-free DRU
- Save function
  If marine incidents occur, record the data, which are recorded to the capsule, to the safe storage area for a long term recording by this function.

▌Easy to input the sensor data and review stored data

The onboard sensors can be integrated and interfaced to the VR-7000/7000S thanks to Video LAN converter and sensor adapters.
Also, the collected data can be replayed with the PC software or extracted onto a USB flash memory for later analysis.

▌Live Player V5

This software extracts and displays the data recorded in the Data
Recording Unit, in real time, on the networked PC screen. In addition,
The data can be extracted and displayed remotely on the PC screen
anywhere via satellite connection. Also, the data can be replayed for
a more thorough data analysis at a later date.

▌Remote Alarm Panel

At-a-glance recognition of VDR status with minimal operation.

SPECIFICATIONS

Product Name		VOYAGE DATA RECORDER / SIMPLIFIED VOYAGE DATA RECORDER	
Data Collecting Unit (DCU)	Recording Period	720 hours	
	Interface	Ethernet (IEC 61162-450)	13 ch (1 ch for PC)
		Serial (IEC 61162-1/2) Input	2 ch (when interfaced with the MC-3000S, 4 additional channels can be added)
		Serial (IEC 61162-1) Input	6 ch (when interfaced with the MC-3000S, 4 additional channels can be added)
		Digital Input	Option (when interfaced with the MC-3020D, 8 channels can be added)
		Analog Input	Option (when interfaced with the MC-3010A, 3 channels can be added)
		Bridge audio	8 ch
		VHF audio	2 ch
		Remote Alarm Panel	1 ch
		24 VDC for Fixed DRU	1 ch
		24 VDC for Float-free DRU	1 ch
		24 VDC for Sensor Adapter	1 ch
		AMS (Serial IEC 61162-1 Input/Output)	1 ch
		AMS (Contact)	Input: 2 ch
			Output: 3 ch
		USB	1 ch (for USB flash memory to extract the data only)
Fixed Data Recording Unit (Fixed DRU)*	Memory	32 GB	
	Recording Period	48 hours	
Float-free Data Recording Unit (Float-free DRU)*	Memory	64 GB	
	Recording Period	48 hours	
Remote Alarm Panel	Display	4.3" color LCD	
Video LAN Converter	Interface	DVI-D/RGB: 2 ch	
		Ethernet: 1 ch	
Sensor Adapter (Serial)	Interface	IEC 61162-1/2: 4 ch	
		IEC 61162-1: 4 ch	
		Ethernet: 1 ch	
Sensor Adapter (Analog)	Interface	Analog Input: 3 ch	
Sensor Adapter (Digital)	Interface	Digital Input: 8 ch	
Intelligent Hub	Interface	Ethernet: 8 ch	
Switching Hub	Interface	Ethernet: 8 ch	

* Select one for VR-7000S

POWER SUPPLY

DCU	100-230 VAC: 1.6-0.7 A, 1 phase, 50-60 Hz
Video LAN Converter	24 VDC: 0.7 A

ENVIRONMENT

Ambient Temperature	DCU	-15˚C to +55˚C
	Fixed DRU	-25˚C to +55˚C
	Float-free DRU	-20˚C to +55˚C
	Microphone	-15˚C to +55˚C
	Waterproof Microphone	-25˚C to +55˚C
	Remote Alarm Panel	-15˚C to +55˚C
	Video LAN Converter	-15˚C to +55˚C
Relative Humidity		95 % at 40˚C
Degree of Protection	DCU	IP20
	Fixed DRU	IP56 equivalent
	Float-free DRU	IP67 equivalent
	Microphone	IP22
	Waterproof Microphone	IP56
	Remote Alarm Panel	IP22 (front panel), IP20 (back)
	Video LAN Converter	IP22 (bulkhead mount), IP20 (tabletop mount)
Vibration		IEC 60945 Ed. 4

EQUIPMENT LIST

Standard

1. Data Collecting Unit (DCU)	VR-7010	1 unit	
2. Remote Alarm Panel	VR-7017	1 unit	
3. Fixed Data Recording Unit (Fixed DRU)*	VR-7020	1 unit	
4. Float-free Data Recording Unit (Float-free DRU)*	VR-7021F	1 unit	
5. Junction Box for Float-free DRU	VR-7022F	1 unit	
6. Video LAN Converter	IF-7100	0~2 units	
7. Microphone	VR-7011	} 1~8 units	
8. Waterproof Microphone	VR-7012W		
9. Sensor Adapter (Serial)	MC-3000S	0~2 units	

* Select one for VR-7000S

Option

1. Sensor Adapter (Serial*[1]/Analog/Digital) MC-3000S/3010A/3020D
2. Video LAN Converter*[2] IF-7100
3. Microphone VR-7011
4. Waterproof Microphone VR-7012W
5. Intelligent HUB HUB-3000
6. Switching HUB HUB-100
7. SSD for DCU
8. DVI cable

*[1] Up to 8 units (including 1 unit of the standard configuration) can be connected
*[2] Up to 2 units (including 1 unit of the standard configuration) can be connected
