

### SM200 Wireless Helm & Systems Control

Direct wireless control of helm, propulsion, and auxiliaries.

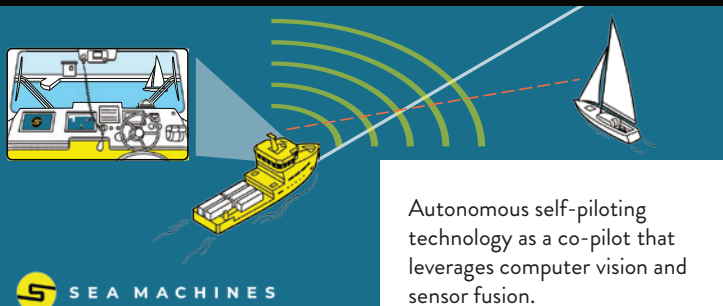

Up to 1,000 meters wireless range.

### SM300 Autonomous Command & Control (Remote)

Autonomous self piloting technology for commercial vessels that enables remote command from any networked location.

### SM360 Autonomous Pilot Assist (Onboard)

Autonomous self-piloting technology as a co-pilot that leverages computer vision and sensor fusion.

### AI-ris

A new operational domain sensor that uses technology to see the world like a human but with regularity and greater precision.
